

SISA Environmental Policy

At SISA, we are committed to conducting our business in an environmentally responsible and sustainable manner. We recognize that our operations can impact the environment and are dedicated to minimizing these effects through sustainable practices, compliance with legal and regulatory requirements, and continuous improvement in our environmental performance.

Our Commitments

1. Legal Compliance

- We will comply with all applicable environmental laws, regulations, and industry standards.
- We will monitor and adapt to evolving environmental legislation and regulatory frameworks to ensure continuous compliance.

2. Environmental Performance & Sustainability

- We will assess and regularly measure our environmental impact, including greenhouse gas (GHG) emissions, energy consumption, and resource use, to identify opportunities for improvement.
- We will set and review environmental objectives and targets, including:
 - Reducing GHG emissions and progressing towards decarbonisation.
 - Improving energy efficiency across all operations and promoting the use of renewable energy.
 - Optimizing water consumption, preserving water quality, and implementing responsible water management systems.
 - Enhancing air quality by minimizing emissions and pollutants.
 - Managing chemicals responsibly to prevent contamination and reduce hazards (responsible chemical management).
 - Promoting sustainable resource management, waste reduction, and prioritizing reuse and recycling initiatives.
 - Protecting soil quality and reducing noise emissions from our operations.

3. Biodiversity and Ecosystem Protection

- We are committed to protecting biodiversity, minimizing negative impacts on ecosystems, and responsibly managing land use to prevent deforestation and habitat loss.
- We will consider animal welfare in our operations and supply chain, ensuring humane treatment and avoiding activities that harm natural habitats.

4. Continuous Improvement

- We will implement and maintain an Environmental Management System (EMS) to track performance and drive continuous environmental improvement.
- We will encourage innovation and invest in new technologies that support sustainability and decarbonisation goals.
- We will provide training and awareness programs to engage employees in adopting and promoting environmentally responsible practices.

5. Stakeholder Engagement & Transparency

- We will work collaboratively with suppliers, customers, and community stakeholders to promote environmental best practices and sustainable approaches.
- We will maintain open and transparent communication on our environmental initiatives, performance metrics, and progress toward sustainability goals.

Review & Accountability

This policy will be reviewed periodically and updated as necessary to remain relevant and effective. All employees and stakeholders are expected to uphold and actively support our commitment to environmental sustainability.
